ADST/WDL/TR--93-003076　　　　　　　　　　　　　　　　April 2, 1993

Table of Contents

1.0   Scope

This Version Description Document (VDD) contains a functional description of the Planned View Display (PVD) software, all modules in this release are identified by version number, a set of build instructions, installation procedures, identification of any known problems, release notes and any essential data relationships that are part of this 2 April 1993 release of the BDS-D PVD 1.0.0.

1.1   Identification

This VDD defines the 2 April 1993 initial release of the PVD, release version BDS-D PVD 1.0.0.

1.2   System Overview

Soldier in the loop simulators exist at the Aviation Test Bed (AVTB) located at Ft. Rucker, Alabama and the Mounted Warfare Test Bed (MWTB) located at Ft. Knox, Kentucky. The simulators include Rotary Wing Aircraft (RWA, only at Ft. Rucker), M1 tanks, Bradley Fighting Vehicles, Fixed Wing Aircraft (FWA), a Management, Command and Control system (MCC), Non Line of Sight vehicle (NLOS, located at Ft. Knox only), and, finally, a Semi-Automated Forces system (SAFOR). The PVD is a stand-alone system which is connected to the Simulation Network (SIMNET). It's function is to provide a map based "God's eye view" of one or more distributed simulation exercises. The PVD can display the entire terrain database or selected regions via menu selection. Vehicles in the distributed simulation are represented by small icons that show the vehicle location and hull/turret orientation. Intervisibility between vehicles on the terrain can be displayed. The PVD can remotely control the datalogger and stealth vehicle.

1.3   Document Overview

This document was prepared in accordance with DID DI-MCCR-80013A of DOD-STD-2167A and defines the 2 April 1993 release of version BDS-D PVD 1.0.0.

2.0 Referenced Documents

2.1 Government Documents

ADST/WDL/TR--93-003077   PVD Coldstart Procedures
2 April 1993

3.0   Version Description

This release includes the version BDS-D PVD 1.0.0 of the Planned View Display.

3.1   Inventory of Materials Released

Listed below is the physical media and support documentation required to build, load and operate the PVD. The PVD release version BDS-D PVD 1.0.0 consists of all the source code needed to build the system, executables and data files required to run the system on a Masscomp 5600 machine, as well as load maps of this official delivery.

Type	ID No.	Title
DC 6150 Tape *		BDS-D PVD 1.0.0
Document	ADST/WDL/TR--93-003077	PVD Coldstart Procedures
Document	ADST/WDL/TR--93-003076	BDS-D PVD 1.0.0 VDD

* Delivered upon request may require approval of STRICOM.

3.2   Inventory of CSCI Contents

Appendix A provides a listing of all of the PVD CSCI source files which were used to create release BDS-D PVD 1.0.0. All source files reside on the Configuration Management and Control Sun Sparc workstation and are configuration controlled using the Revision Control System (RCS), which is described in more detail in the ADST Configuration Management Plan Doc #: ADST/WDL/TR--92-003023, 15 January 1993 and in Appendix A of this document.

3.3   Changes Installed

This release of the version BDS-D PVD 1.0.0 captures the Masscomp based PVD SIMNET 4.2 software version. No additional SP/CRs are included in this release.

3.4   Adaptation Data

Not applicable. There is no adaptation data for the PVD.

3.5   Coldstart Procedures

The separate PVD Cold Start Procedures Manual, document no. ADST/WDL/TR--93-003077, provides detailed cold start instructions for the BDS-D PVD 1.0.0 release.

3.6   Build and Distribution Instructions

Building the PVD 1.0.0

The following equipment and instructions are necessary for building the Planned View Display version 1.0.0.

System Requirements:

Masscomp 5600
150 Mb cartridge tape drive
25 Mb disk space
Unix Version simnet Release 4.0A
Masscomp C compiler version 1.3

Instructions:

1)   Login to the Masscomp 5600 target system as "guest" or "root"

2)   Make the following directory for dumping the PVD delivery tape.

      mkdir /pvd

3)   Load the pvd release tape in the tape drive and dump it to the pvd directory created in step 2.

      cd /pvd
      tar xvapf /dev/rctp   (Note: Inquire with the system manager for the name of the tape drive on the target machine.)

4)   From the "/pvd" directory, make symbolic links if they are not already there.

      ln -s /pvd/common /common
      ln -s /pvd/simnet /simnet

5)   From the "/pvd" directory, run the following script to build the libraries and link the executable. The directory path for where the build will be performed must be added as a parameter to the build command.

      cd /pvd
      BUILD_PVD /pvd

      (Note: Review the error logs to determine if the build was successful.)

3.7   Regression Test   Results

This release is a recreation of PVD (BBN) version 4.2 after being placed under configuration management control. No existing PVD test procedures are available for regression testing. A successful CM build was verified by operational use of the PVD release in the Loral, San Jose Software Development Facility (SDF).

3.8   BDS-D PVD Software Release Notes

4

There are no release notes available for the BDS-D PVD 1.0.0 application software initial release.

3.9 Interface Compatibility

The BDS-D PVD 1.0.0 release remains compatible with the SIMNET interface.

3.10 Bibliography

> Management, Command and Control System (MCC) Operations Documentation Report No. IEITR-74563; 15 March 1990.

3.11 Summary of Changes

Initial release. No changes to functionality were made in this release.

3.12 Installation Instructions

Detailed installation instructions for the PVD are included as part of the Cold Start Procedures Manual for the PVD 1.0.0, Doc. # ADST/WDL/TR--93-003077, April 2, 1993.

3.13 Possible Problems, Known Errors and Enhancements

The open SP/CR's pertaining to this system release are as follows:

SP/CR #	Title
123	Add logging of DIS PDU's to logger 1.0.0

4.0   Notes

The following is a list of acronyms used in this document.

ADST	Advanced Distributed Simulation Technology
AVTB	Aviation Test Bed
BBN	Bolt, Beranek, & Newman
MWTB	Mounted Warfare Test Bed
FWA	Fixed Wing Aircraft
MCC	Management, Command and Control system
NLOS	Non Line of Sight
RWA	Rotary Wing Aircraft
SAFOR	Semi-Automated Forces system
SP/CRs	Software Problem/Change Reports
VDD	Version Description Document
CSP	Cold Start Procedures

Appendix A Source Code Listings

BDS-D PVD 1.0.0 RCS Description

The baseline code for BDS-D PVD 1.0.0 is documented in listings attached to this Appendix. Starting at the top of the PVD directory tree, a history of each file is produced from the Revision Control System (RCS) subdirectories. All baselined PVD files are checked into the RCS subdirectories. RCS files (denoted by the ",v") and its corresponding working file make up each directory in the PVD directory tree. Along with each filename is a brief description of the reason for the check in. For example, "Initial Turnover - BBN's 6.6.1" documents the reason for checking the code into RCS. RCS automatically supplies a revision number. Each file checked into RCS is initially assigned a revision number of 1.1. Revision numbering is incremented in tenths (1.2, 1.3, 1.4, etc.,).

A snapshot of what was turned over by BBN and successfully built and tested was brought under LORAL configuration management control and assigned a release number of BDS-D PVD 1.0.0. This release consists of all the source code required to produce the PVD executable, and configuration and data files necessary to run the PVD application on a Masscomp 5600 computer. These files and their corresponding RCS revision number, are represented in the following listings.

```
RCS file: ./common/data/RCS/cif.def,v
